StockSense ML Predictor

Next-day price direction prediction using machine learning

How it works

Select a stock from the sidebar, choose your training period, then click **Analyze & Predict**.

The model trains a **Random Forest Classifier** on 7 core technical indicators (RSI, MA ratios, price returns, and volume ratios) and predicts whether tomorrow's price will be **UP** ↑ or **DOWN** ↓, generating a **BUY** / **SELL** / **HOLD** signal.

7 Indicators

RSI, SMA ratios, crossovers, volume ratios

Random Forest

A robust tree classifier built for daily predictions
